Oikos	Slovenia	20,030.05 €	20%	5	Government of the Republic of Slovenia, Government Office for Growth	Government of the Republic of Slovenia	January 2006 – January 2007	-
Detailed description of project						Type of services provided		
<p>The Resolution presents programming in detail at the project level. It introduced certain novelties and previously-unknown approaches, and consequently caused a good deal of mistrust within the Slovenian environment. One of the novelties is undoubtedly that the Government succeeded in drawing up a red line around development, which is possibly a category too abstract for the ordinary citizen to understand at the level of the country's strategic documents. It involves a clear link between Slovenia's Development Strategy, the Strategy of Spatial Development, the National Development Plan, national sectorial strategies, operational programmes for EU funds and at the project level. The Resolution presents national priority projects to be implemented within a certain time period varying from National Business Centres of Slovenia to railways and tourist infrastructure.</p> <p>Oikos assisted in defining goals and objectives, defining criteria for selecting the projects, preparation of a priority list of the projects, budget planning and projects for spatial location within the country. Oikos assisted in the development of a system for the implementation of the projects and assisted ministries in the evaluation of the projects before going to budget lines of the State Budget.</p> <p>Further information is available on:</p> <p>http://www.svr.gov.si/fileadmin/srs.gov.si/pageuploads/RESOLUCIJA-ang-internet.pdf</p>						<ul style="list-style-type: none"> • Organisation and facilitation of workshops • Analysis of land use and potential, definition of core development areas, locations for listed projects • Consensus building among different sectors • Project selection criteria, project assessment • Suggestions for implementation, accessibility and networking of different project results and outputs • Budget planning, potential and implications for public-private partnerships • Project preparation support to the ministries of the Economy (business development, tourism, energy), Justice, Health, Public Affairs etc.
